

Chain of Evidence

Can you tell me which mountain range is longer, the Alps or the Pyrenees?

User

LLMs

The Pyrenees are longer than the Alps.

Non-Factual. The answer that the Pyrenees are longer than the Alps is incorrect. According to the evidence provided, the Alps are actually longer, with a length of 1200 kilometers, while the Pyrenees have a length of only 491 kilometers. Therefore, the answer contains faulty reasoning and incorrect conclusions.
